

Room Tracker — Security & Feature Update

May 12, 2026

I just rolled out a security update plus some new features on the Room Tracker app. The way you sign in has changed, so please read this before you next open the tracker.

How to log in now

The login screen now has two fields:

- **Your name** — must match the name I have registered for you on the staff list. Use the exact spelling I gave you (Geverson, Rodrigo, Maria, etc.). If your name isn't on the list, you won't get in.
- **A property PIN** — same for everyone on the team. The PIN is on the next line.

Property PIN: 27200

Please keep this PIN confidential — don't post it on a wall, don't text it to anyone outside the team, and don't share it with vendors or guests. If you suspect it's been leaked, let me know and I'll change it.

What's new in the app

- **Real names required.** No more typing whatever you want. Your check-marks are now tagged to your actual staff name automatically.
- **Activity log (admin-only).** I can now see a full history of who did what and when — every check, uncheck, mark-floor, clear-floor, and reset. The log keeps the last 30 days. Day-to-day, you'll never need to think about it.
- **Reset is admin-only.** The big "Reset all" button is gone for non-admins, so no more accidental wipes of the whole day's work.
- **Closet Hooks** is the fifth task on every room (new column on the floor table).
- **East Tower Floor 1** — rooms 114, 117, 118 — is now in the system.
- **Color-coded percentages** at the top — red, orange, yellow, green — tell you at a glance how each task is tracking.
- **"Select all" pill** under each task column — one tap marks the whole column done for the current floor.
- **Click any task %** at the top to open a detail view showing every room with that task across both towers. Filter by All / Completed / Incomplete.
- **Dark / light theme toggle** — sun/moon icon in the header.

Install on your phone (iPhone)

1. Open <https://gevi14.github.io/Room-Task-Tracker/> in Safari (not Chrome).
2. Tap the Share button at the bottom of Safari (square with up-arrow).
3. Scroll down and tap "Add to Home Screen".
4. Tap "Add". The app icon now lives on your home screen and opens with one tap.

After this, you sign in once and you stay signed in for the session.

Install on your computer (Windows / Mac)

You can pin the app to your desktop so it opens in its own window like a regular program — no browser tabs, no address bar.

Method 1 — Install as an app (recommended; works in Chrome and Edge):

5. Open <https://gevi14.github.io/Room-Task-Tracker/> in Chrome or Edge.
6. Click the three-dot menu (⋮) in the top right of the browser.
7. **In Chrome:** Save and share → Create shortcut. **In Edge:** Apps → Install this site as an app.
8. Give it a name (e.g. "Room Tracker"). In Chrome, check the "Open as window" box. Click Create / Install.
9. The app now appears as an icon on your Desktop and in your Start menu. Double-click it any time to open the tracker in its own window.

Method 2 — Quick Desktop shortcut (universal, no install):

10. Right-click on an empty spot on your Desktop.
11. Choose New → Shortcut.
12. Paste this URL into the box: <https://gevi14.github.io/Room-Task-Tracker/>
13. Click Next, name it "Room Tracker", click Finish.
14. Double-click the new Desktop icon any time to open the tracker.

Method 3 — Pin to the taskbar:

15. Open the app in Chrome or Edge.
16. Right-click the browser tab → "Pin". The tab stays pinned in your browser so it's always one click away.
17. Alternative: drag the address-bar icon onto your taskbar to create a permanent taskbar shortcut.

Try logging in right now

18. Open <https://gevi14.github.io/Room-Task-Tracker/> on your phone or computer.
19. If you previously installed it, just open the icon. Otherwise install it using the steps above.
20. Enter your name and the PIN (27200).
21. Tap or click Start — you're in.

If you see an error:

- **"Wrong PIN"** → double-check you typed 27200 exactly.
- **"That name isn't on the staff list"** → reply to this email and I'll add you in under a minute.
- **"Your account is inactive"** → same as above, reply and I'll reactivate.

Thanks for rolling with the change.

[Your name]
